

# Github Flow Chart

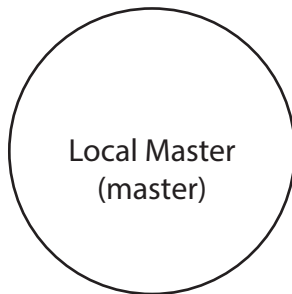

On GitHub, submit and accept pull requests  
so that everyone else can access your changes

## Start Here

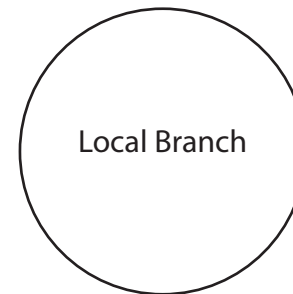

**Pull the most up to date  
code from GitHub**

>git checkout master  
>git pull origin master

**Make a branch to  
add your code**

> git checkout {branch name}

## Push branch to GitHub

> git push origin {branch name}

## Commit your changes

>git add  
>git commit -m '{message}'

Make sure you have any new changes  
that may have been made to GitHub  
repo since you last pulled from origin  
>git checkout master  
>git pull origin master

Merge with your branch  
>git checkout {branch name}  
>git merge master

Resolve any merge conflicts
